

We are the inventors of automatic deburring with defined geometry, and we supply system solutions — from individual systems to complex assembly lines — for the workpieces of customers to whom the process is of primary importance.

With more than 25 years of experience in robot automation, we guarantee our customers a reliable process.

Our core areas of expertise are in the following three business areas:

Tools

Machinery

Systems

WMS-engineering

We make solutions

“Manual deburring is a significant risk factor in the value-added chain. With our automated deburring systems, we guarantee a reliable process.”

STEPHAN VON SCHNEYDER
CEO

Deburring — For what purpose?

WMS-engineering GmbH is your professional partner for customer-targeted system solutions in robot-based, mechanical deburring. We don't just advise you — we provide you with the complete solution.

OUR FOCAL POINTS

- Compact cell solutions
- Deburring systems and tools
- Handling cells
- Complete solutions / Linked lines
- Special systems
- Integration of additional modules such as measuring, weighing, washing,...

OUR SERVICES

- Consultation
- Analysis & development
- Planning
- Production & assembly
- Programming
- Commissioning
- Training
- Service & spare parts

At a glance

Precision deburring — from the initial idea to the turn-key system — that has been our aspiration and passion for many years.

OUR REFERENCES

BMW, Daimler, Bosch, John Deere, ZF and many other companies already rely on the powerful, modular system solutions from WMS. Let us convince you with our services.

Training services

Satisfied employees are the cornerstone of our company. We have understood that it is not enough to insist. We support our employees, thus assuring our technological superiority and our position on the market.

As one of the technology leaders on the Upper Rhine, WMS-engineering GmbH is not only a magnet for specialists in the field of robot programming, for example. As a partner of well-known companies such as ABB, FANUC, KUKA and many others, our employees have access to far-reaching further training measures which are rarely available in this form.

We assist our employees and promote their personal, targeted development — as apprentices, students or long-time employees. This means that we're always one step ahead of our competitors.
